

A asymmetry

Is the lesion a mirror image, or the same on both halves? Is it more or less round?

B border irregularity

Can you easily tell where the lesion starts and stops?

C color

Is the lesion dark? Is the color across the lesion the same? Are there variations in color?

D diameter

How large is the lesion? Is it larger than a pencil eraser?

**Any changing in size, shape or darkening of color, or if there is asymmetry or irregularity, the lesion should be examined by a physician.
